My Projects

Movie-box

Movie App, a React-based web application that offers a variety of features for movie enthusiasts. With this app, you can explore a curated list of popular movies, access movie details including titles, posters, genres, and ratings, watch trailers, and even play movie quizzes. It seamlessly integrates with The Movie Database (TMDb) API to fetch up-to-date movie data.

CUBIT

- **CUBIT** is a responsive ecommerce online website that which appears amazingly on all devices with a nice color theme.
- **CUBIT** was made with Html,Css and JavaScript.

Weather App

- A Vue Weather App is designed to display weather information for a specified location. It utilizes Vue.js to create a dynamic user interface.
- Displays current weather information including temperature, conditions, wind speed, humidity, and more.
- Shows a forecast for upcoming days.
- Allows users to view additional weather details by clicking on the "More" button.
